

Three ways infusion suites make your treatment easier

Get your infusions on your terms. Our infusion suites give you expert, comfortable treatment with convenience at every step.

1 Flexible

We have convenient suites located across the country. Unlike many infusion centers, we're open evenings and weekends. Those longer hours mean you can get your treatment when it fits your schedule.

2 Convenient

At an Optum® Infusion Pharmacy infusion suite, all you have to do is get comfortable. We'll take care of the rest. When your infusion is done, you can leave your treatment behind and go home to the rest of your life.

Designed with your comfort in mind

Our infusion suites offer:

- Easy, free parking
- Private or shared rooms with personalized care
- Comfortable recliner chairs and accommodations

3 Safe

You'll get personalized care at every step.

- Our clinicians are trained on your specific condition and medication.
- A pharmacist and a nurse are always available to monitor your treatment and answer your questions.
- We work hand-in-hand with your doctor on your whole treatment plan.
- We sterilize each suite after every visit.
- Our friendly staff members get to know you – the real you – not just your condition.

“

Everyone cares for every single patient. We all know them by name. It's a very big yet small family. I would send my family here. I would want all of my co-workers to be able to take care of my family members, if needed.

Sarah

Infusion suite nurse, Optum Infusion Pharmacy

Managing infusion treatments is easier with expert help

The day of your treatment, the nurse will:

- Check your vital signs
- Prepare your medications
- Start your infusion and check on you throughout treatment so you can read, watch a movie or even take a nap
- Schedule your next infusion appointment
- Document the treatment and share the details with your doctor to keep them informed of your progress
- Monitor you for a little while after the infusion and help with any adverse reactions right away

99.5%

of Optum Infusion Pharmacy patients have no adverse reaction or infection.*
